Thomas Dane Gallery was one of a number of galleries to use ROKBOXs to reduce their packing wastage in Art Basel this year.

Alongside using the ROKBOX they own, the gallery rented a ROKBOX lite (1.2m x 1.2m) to carry a painting from New York to Basel through [ROKBOX LOOP](#).

Hannah Wright, Associate Director: Operations and Registrar at Thomas Dane Gallery reported back:

“We have used the ROKBOX we own multiple times for art fairs to and from the UK with success but **it is great now that ROKBOX LOOP exists to be able to take advantage of this internationally.**”

“During transit neither the ROKBOX or the artwork were damaged in anyway, and unpacking on the booth was very simple.

“A crate for this would have cost \$630 and the ROKBOX rental cost us \$240 with our GCC Active Membership discount. Even without the discount the ROKBOX rental is more cost effective.

“All in all I would definitely use ROKBOX again!”
Hannah Wright, Thomas Dane Gallery

Using ROKBOX LOOP (vs a wooden crate) prevented nearly half a tonne (410kg) of carbon pollution from entering the air and environment, in addition to saving packaging waste.

Thank you to everyone at [Thomas Dane Gallery](#).

Protect your art, your budget and your environment with ROKBOX LOOP

Available in 11 cities. Designed in collaboration with shippers, climate scientists, conservators & engineers to:

- 
LOWER THE COSTS OF SHIPPING
 From \$380 p/week, \$480 p/month, \$720 p/3 months.
